**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.**

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.**

**HOW TO REPLY TO THIS NOTICE:**

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to:** **Mail Stop ISSUE FEE**  
**Commissioner for Patents**

## Determination of Patent Term Extension under 35 U.S.C. 154 (b)

(application filed after June 7, 1995 but prior to May 29, 2000)

The Patent Term Extension is 0 day(s). Any patent to issue from the above-identified application will include an indication of the 0 day extension on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Extension is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

**DETAILED ACTION**

1. Claims 1-8, 31-54 are presented for examination.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aldo Martinez, Reg. No. 61,357, on January 8, 2010.

3. The application has been amended as follows:

Claim 1 (Currently Amended): A method of forwarding email, comprising:  
  
downloading an email forwarding engine from a server computer to a client personal computer, the downloaded email forwarding engine including computer-readable instructions to cause the client personal computer to  
  
examine start criteria, the start criteria being independent of email stored in an email datastore of an email server;  
  
determine whether the start criteria are met;

obtain new email events from the email datastore when the start criteria are met, the new email events including transactional information indicating a status of the email stored in the email datastore of the email server;

forward information including the new email events via a computer network to a datastore associated with the server;

compare the start criteria stored on the client personal computer with start criteria stored on the server; and

synchronize the start criteria stored on the client personal computer and the start criteria stored on the server when a difference is detected therebetween,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 2 (Currently Amended): A system for forwarding email, comprising:  
a server computer storing a client software for downloading to a client personal computer, the client software including  
a client configuration engine configured to determine whether start criteria are met, the start criteria being independent of email stored on an email datastore of an email server, the client configuration engine also being configured to compare the start criteria stored on the client personal computer with start criteria stored on the server and to synchronize the start criteria stored on the client personal computer with the start criteria stored on the server when a difference is detected therebetween;

a retrieval engine, coupled to the client configuration engine, configured to receive new email events from the email datastore, the new email events including transactional information indicating a status of the email stored on the email datastore of the email server; and

a data transmitter, coupled to the retrieval engine, configured to forward information including the new email events via a computer network to a datastore associated with the server,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 3 (Currently Amended): A method of forwarding email, comprising:  
establishing a communications channel between a server and a client personal computer system;

downloading, to the client computer system, an email forwarding engine;  
receiving, at the client computer system, information including new email events from an email datastore of an email server, the email events including transactional information indicating a status of emails stored on the email datastore of the email server;

storing the information including the new email events in a datastore associated with the server;

forwarding the information stored in the datastore associated with the server to an appropriate client personal computer; and

comparing start criteria stored on the server with start criteria stored on the client personal computer, the start criteria stored on the server and the start criteria stored on the client personal computer being independent of the information stored in the datastore,

wherein the start criteria of the client personal computer is synchronized to the start criteria of the server when a difference is detected therebetween, and the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 4 (Currently Amended): A system for forwarding email, comprising:  
a server computer including a datastore and a client software for downloading to a client personal computer, the client software including  
a retrieval engine to retrieve new email events from an email datastore of an email server, the email events including transactional information indicating a status of emails stored on the email datastore of the email server, and  
a client configuration engine configured to determine whether start criteria are met, the start criteria being independent of the emails stored on an email datastore, the client configuration engine also being configured to compare the start criteria stored on the client personal computer with start criteria stored on the server and to synchronize the start criteria stored on the client personal computer with the start criteria stored on the server when a difference is detected therebetween;

the server being configured to establish communications with the client computer system, receive information including new email events from the client computer system, store the information including the new email events in the datastore of the server, and convey the information stored in the datastore of the server to an appropriate client personal computer,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 5 (Currently Amended): A method of forwarding email, comprising:  
  
downloading an email forwarding engine from a server computer system to a client personal computer, the downloaded email forwarding engine including computer-readable instructions to cause the client personal computer to  
  
obtain filter control data, the filter control data being independent of email data, the email data including transactional information indicating a status of the email data;  
  
examine the email data against the filter control data;  
  
determine the email data that will be forwarded based on the examination;  
  
select at least one transfer protocol for the email data based on the examination;  
  
forward the email data according to the at least one transfer protocol via a computer network to a datastore associated with the server;  
  
compare the filter control data stored on the client personal computer with filter control data stored on the server at predetermined time intervals; and

synchronize the filter control data stored on the client personal computer to the filter control data stored on the server when a difference is detected therebetween,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 6 (Currently Amended): A system for forwarding email, comprising:  
a server computer including a client software for downloading to a client personal computer, the client software including

a filter configured to examine email data against filter control data to select email data based on the examination, and configured to determine at least one transfer protocol for the email data based on the examination, the email data including transactional information indicating a status of the email data;

a data transmitter, coupled to the filter, configured to forward the email data according to the at least one transfer protocol via a computer network to a datastore associated with the server and server software that forwards the forwarded email data to a remote device;

a client configuration engine configured to compare the filter control data stored on the client personal computer with a filter control data stored on the server and configured to synchronize the filter control data stored on the client personal computer to the filter control data stored on the server when a difference is detected therebetween,

wherein the filter control data stored on the client personal computer and the filter control data stored on the server are independent of the email data, and the transactional information

includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 7 (Currently Amended): A method of forwarding email, comprising:  
downloading a computer program from a server computer system to a client personal computer, the downloaded computer program including computer-readable instructions to cause the client personal computer to

obtain filter control data, the filter control data being independent of email data, the email data including transactional information indicating a status of the email data;

examine the email data against the filter control data;

determine, based on the examination, the email data that should not be forwarded;

generate receipt data identifying the email data that should not be forwarded;

forward the receipt data via a computer network to a datastore associated with the server;

compare the filter control data stored on the client personal computer with filter control data stored on the server; and

synchronize the filter control data stored on the client personal computer to the filter control data stored on the server when a difference is detected therebetween,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claim 8 (Currently Amended): A system for forwarding email, comprising:

a server computer including a client software for downloading to a client personal computer, the client software including

a filter configured to examine email data against filter control data, the filter control data being independent of the email data, and configured to determine, based on the examination, the email data that will not be forwarded, the email data including transactional information indicating a status of the email data;

a receipt generator, coupled to the filter, for generating receipt data identifying the email data that should not be forwarded;

a data transmitter, coupled to the filter, for forwarding the receipt data via a computer network to a datastore associated with the server; and

a client configuration engine configured to compare the filter control data stored on the client personal computer with filter control data stored on the server and configured to synchronize the filter control data stored on the client personal computer to the filter control data stored on the server when a difference is detected therebetween,

wherein the transactional information includes information indicating the email as at least one of created email, forwarded email, replied to email and deleted email.

Claims 9-30 (Canceled).

Claim 31 (Previously Presented): The method of claim 1, wherein the client personal computer is protected by a firewall.

Claim 32 (Previously Presented): The method of claim 1, wherein the downloaded email forwarding engine self-installs.

Claim 33 (Previously Presented): The method of claim 1, wherein the email events include emails.

Claim 34 (Previously Presented): The system of claim 2, wherein the client personal computer is protected by a firewall.

Claim 35 (Previously Presented): The system of claim 2, wherein the downloaded email forwarding engine self-installs.

Claim 36 (Previously Presented): The system of claim 2, wherein the email events include emails.

Claim 37 (Previously Presented): The method of claim 3, wherein the client personal computer is protected by a firewall.

Claim 38 (Previously Presented): The method of claim 3, wherein the email events include emails.

Claim 39 (Previously Presented): The system of claim 4, wherein the client personal computer is protected by a firewall.

Claim 40 (Previously Presented): The system of claim 4, wherein the email events include emails.

Claim 41 (Previously Presented): The method of claim 5, wherein the client personal computer is protected by a firewall.

Claim 42 (Previously Presented): The method of claim 5, wherein the downloaded email forwarding engine self-installs.

Claim 43 (Previously Presented): The system of claim 6, wherein the client personal computer is protected by a firewall.

Claim 44 (Previously Presented): The system of claim 6, wherein the downloaded email forwarding engine self-installs.

Claim 45 (Previously Presented): The method of claim 7, wherein the client personal computer is protected by a firewall.

Claim 46 (Previously Presented): The system of claim 8, wherein the client personal computer is protected by a firewall.

Claims 47- 54 (Canceled).

***Allowable Subject Matter***

4. Claims 1-8 and 31-46 are allowed.

***Drawings***

5. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the current drawings are hand-drawn with hand writings characters which may render the printing of drawings unclear. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action

Art Unit: 2452

to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

## **INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

### **Replacement Drawing Sheets**

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

### **Annotated Drawing Sheets**

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

### **Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenny Lin whose telephone number is (571) 272-3968.
